Vibe Coding

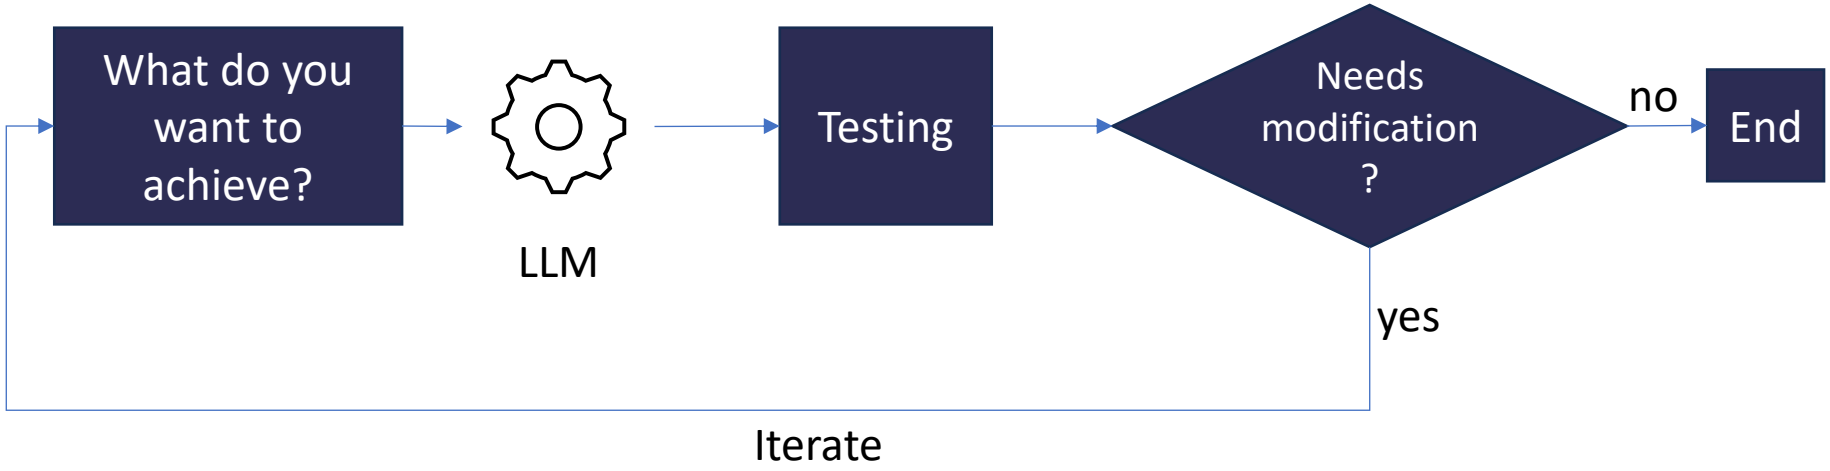
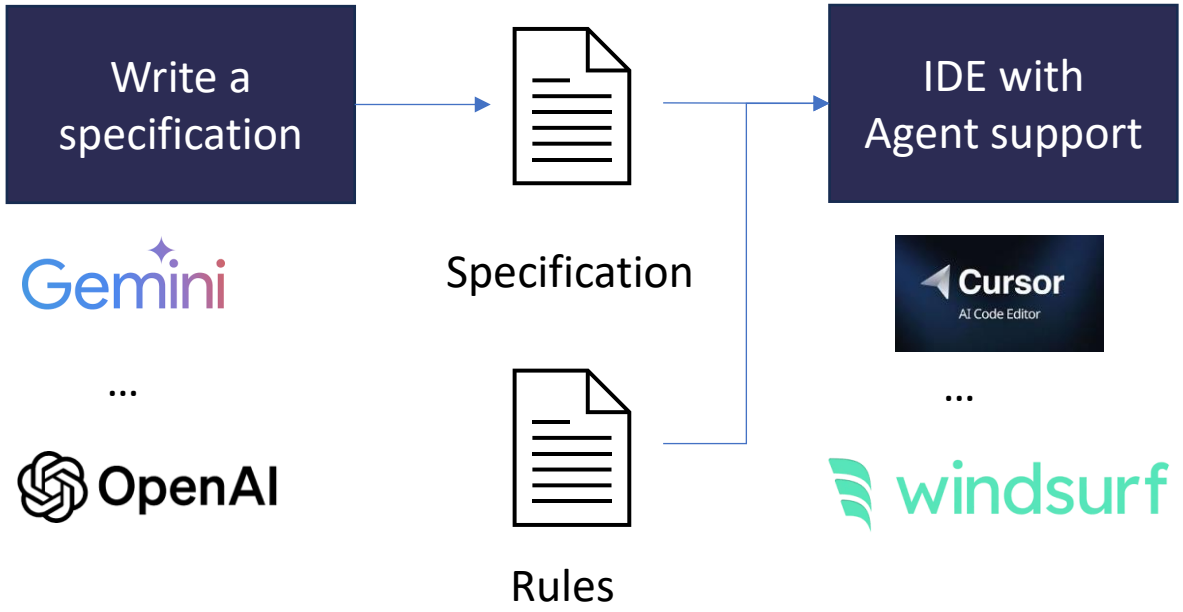
Introduction

- AI-assisted software development
- Developers provide instructions via natural language



Vibe Coding

Procedure

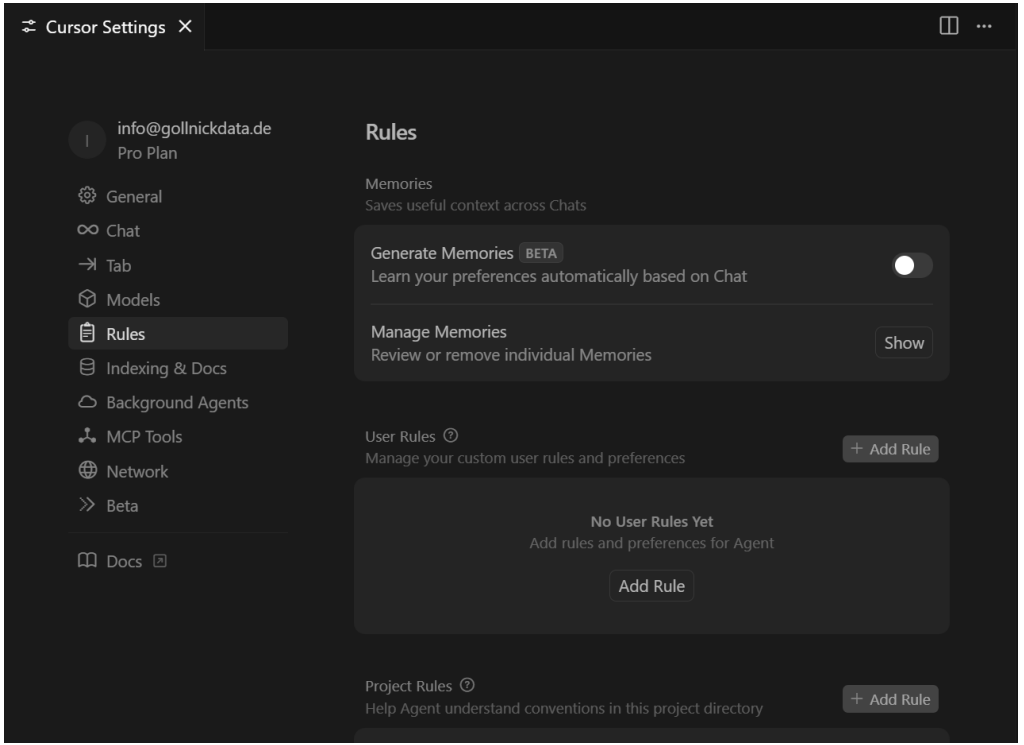


Vibe Coding

Cursor Setup: Rules

- Acts like system message
- Defines how LLM should behave
- Project rules are stored in .cursor/rules

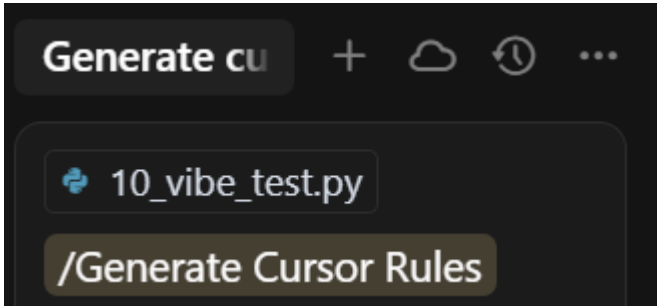
```
project/
  .cursor/rules/
  # Project-wide rules
 backend/ server/
    .cursor/rules/
    # Backend rules
 frontend/
    .cursor/rules/
    # Frontend rules
```



Vibe Coding

Cursor Setup: Rules

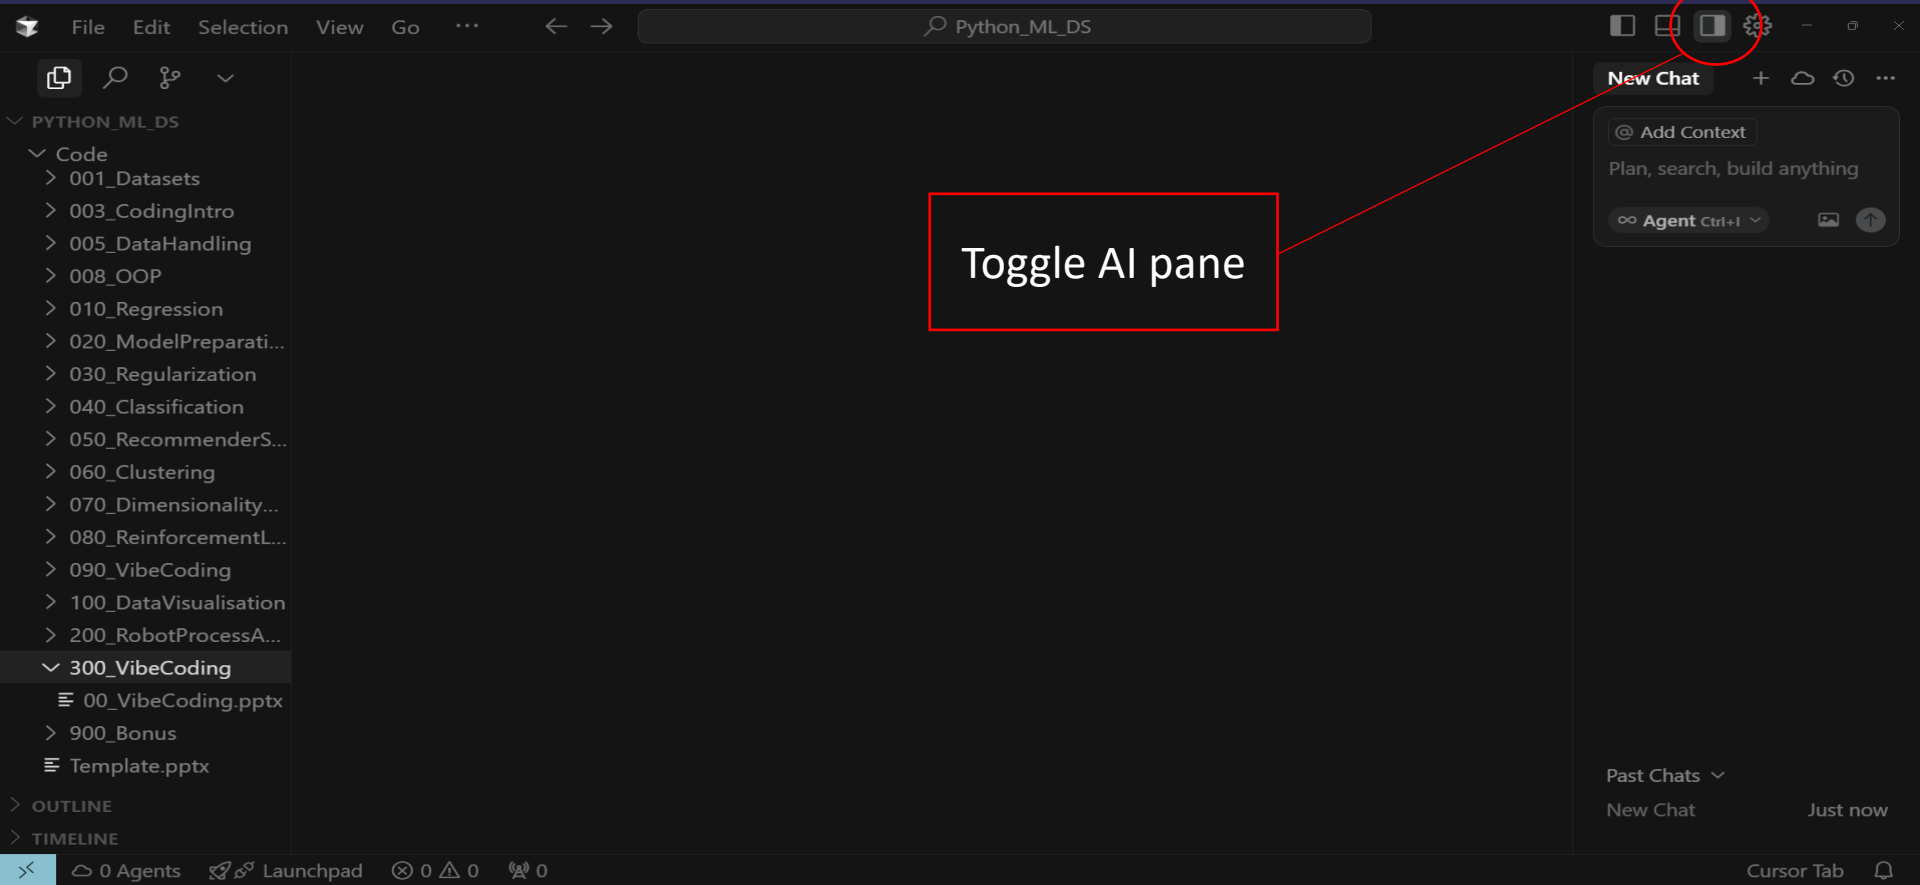
- Acts like system message



Can be generated automatically by cursor

Vibe Coding

Cursor Setup: Toggle AI pane



Vibe Coding

Example: Wordle Clone

- 1. Generate Spec

> write a spec for a wordle clone application. be as specific as possible. use python for backend. only write the spec, dont create any code

Vibe Coding

Example: Wordle Clone

- 2. start AI assistant
