

Programs and Environment: Local

1. Install Python

or

Cursor

2. Install IDE

3. Install git

4. Config & Get Course Material

5. Set up Environment

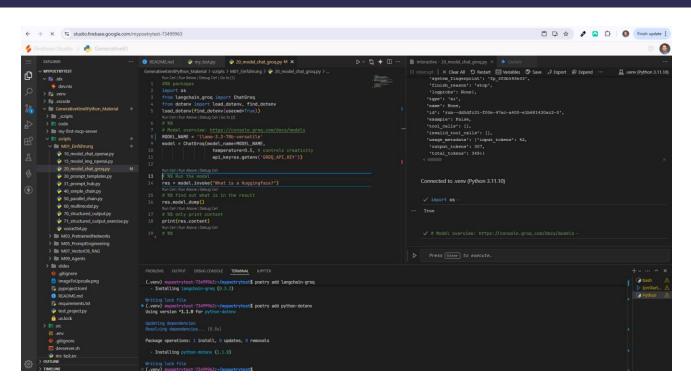

gollnickdata.de

Programs and Environment: Cloud

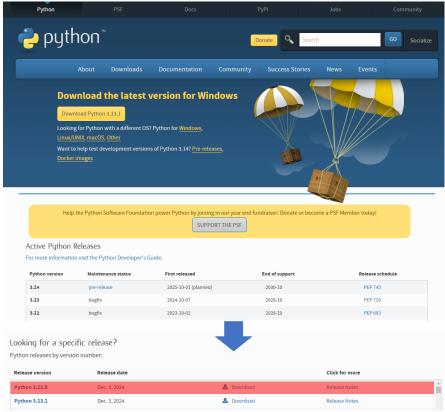

Allows coding in the browser

URL: <a href="https://studio.firebase.google.com/mypoetrytest-73499963">https://studio.firebase.google.com/mypoetrytest-73499963</a>

Python Installation

Source: <a href="https://www.python.org/downloads/">https://www.python.org/downloads/</a>

Git

- 1. Download Git and Install: <a href="https://git-scm.com/downloads">https://git-scm.com/downloads</a>
- 2. Configure git

```
git config --global user.name "John Doe"
git config --global user.email johndoe@example.com
```

3. Clone Repo:

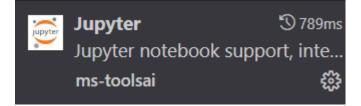

git clone https://github.com/DataScienceHamburg/Python\_ML\_DS\_Material.git

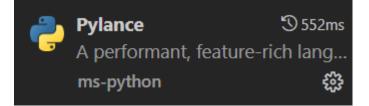

#### Oder Download als ZIP:

https://github.com/DataScienceHamburg/Python ML DS Material

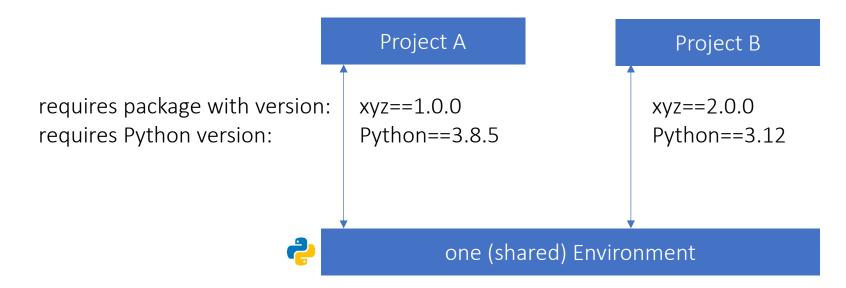

VS Code Extension

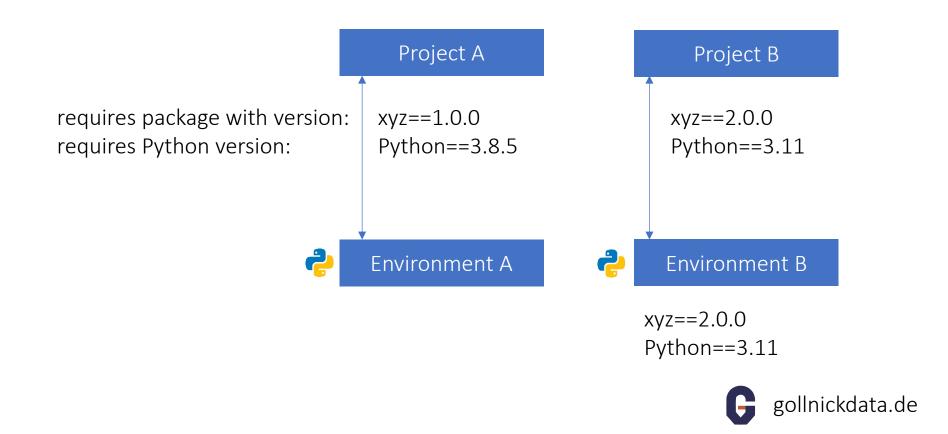

Environment: Problem

package xyz can be available only in one version Python only available in one version

**Environment: Solution** 

Python Environment

An Environment is an isolated bundle of packages and Python versions.

It allows to

- avoid conflicts of packages
- easy setup for a project on another computer
- Available Environments:

Conda (requires Anaconda installation)

venv

Poetry

uv

Python Environment

#### Windows: install C++ Build Tools

The Microsoft C++ Build Tools provides MSVC toolests via a scriptable, standalone installer without Visual Studio. Recommended if you build C++
libraries and applications targeting Windows from the command-line (e.g. as part of your continuous integration worldlow), Includes tools shipped in
Visual Studio 2015 Update 3, Visual Studio 2017, Visual Studio 2019, and latest version of Visual Studio 2022.

Walkthrough: Compiling a Native C++ Program on the Command Line →

How you can use the Build Tools

Python Environment – uv

- use uv as environment
  - 1. pip install uv
  - 2. uv sync

set up from scratch

```
uv init
```

uv python install 3.12

uv venv

.venv\Scripts\activate

uv add langchain
